

## Annotate over Desktop

Annotate over Desktop gives you the option of viewing any other program on your computer while still being able to use the Inspire tools. This will allow you to draw, drag, type text, etc on/over any program you choose. Simply use the toolbar and functions as you would if you were working normally on a flipchart.

When you use this option, a new flipchart is created. This flipchart will save any annotations and/or objects you have added while viewing the other program.

## Desktop Tools

## Camera

Allows you to take a snapshot of what you are viewing on the desktop. Choose from:

**Full screen  
Freehand  
Area**

**Window  
Point to Point**

Once the snapshot is taken, you can choose to add the image to:

- Current Page (of your flipchart)
- New Page (of your flipchart)
- Clipboard
- My Resources or Shared Resources

## On-screen Keyboard

Use this function to type in short answers or URL addresses from the board. It saves you from having to go to the computer keyboard.

## Promethean Planet

One click gets you access to Promethean Planet, where you can find flipcharts and other resources made for your active whiteboard.

## Return to Flipcharts

Return to the flipchart you were working with before working with the desktop.

## Express Poll

Activate your ActiVotes or ActiExpressions to take a quick poll or quiz over what you are viewing.

## Screen Recorder

Allows you to record, in video, what you are doing on your desktop. Choose from:

- Area Screen Recorder
- Full Screen Recorder

## More Tools

Gives you access to the following tools:

Tickertape      Clock  
Sound Recorder      Calculator  
Dice Roller
