

# ACTIVINSPIRE TIPS AND TRICKS

## ***Setting Up Contain Anything Containers***

Contain Anything containers will hold anything placed on the container.

- Add all text, shapes, images, or objects to page and place where desired.
- Select the object that will be the container.
- Go to the ***Property Browser*** and expand the ***Container*** category.
- From the ***Can Contain*** drop down, select **Anything**.
- Click back on the container to set the action.
- **SAVE**
