

# ACTIVINSPIRE TIPS & TRICKS

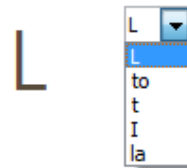

## ***Handwriting Recognition***

Handwriting will automatically be turned into typed text and a drop down menu of the possible spellings will appear. The format of the text is determined by the formatting of the last text box created. Once activated, Handwriting Recognition will remain active until it is deactivated or another tool is chosen.

### ***Using Handwriting Recognition***

1. Click on **Tools, Handwriting Recognition**.
2. The pen tool is automatically activated.
3. Write the word with the pen tool and wait a second.
4. The word is changed to text.
5. If the word given is not correct, click the drop down arrow to view other options. Select the appropriate word if present.

### ***Handwriting Recognition Settings***

1. Go to **File, Settings**.
2. Click on **User Input**.
3. Change **Recognition Timeout** if desired.
4. Choose **Handwriting Recognition Language** if different from English.
