

ACTIVINSPIRE TIPS & TRICKS

Creating the Magic Hat

1. Put all text, images, and shapes on the page. Add the image and/or shape the information will be hidden behind last.

Note- any text that will be hidden will need to be created in separate text boxes so they can be pulled out one at a time.

Note- If you are using an image, you may need to draw a shape (rectangle, square) that is the same color as the page background to place behind the image so that all text is hidden. To place the shape behind the image, select it, right click, select Reorder, then Send Backward. Then select the shape and click CTRL and the image. This will select both the shape and the image. Select the Grouped icon.

2. Using the select tool, select the object or shape you wish to be the "Magic Hat". Make sure it is in the desired location.
3. Right click or use the Object Edit Menu and select **Locked**.
4. Select each text box separately or click and drag across all text boxes to select all at once and drag behind the "magic hat".
5. **SAVE!**

NOTE- Make sure you are in Design Mode when presenting so "magic hat" doesn't move.
