

ACTIVINSPIRE TIPS & TRICKS

Using Restrictors – CAN MOVE:

1. Open ActivInspire
2. Create the object/group of objects to which you'd like to use a restrictor
3. Select the object/group of objects
4. Click on the **Property Browser** (if you do not see your browser, go to VIEW and check off BROWSERS)
5. Click on the plus sign next to **Restrictors**
6. Next to **Can Move**, select **Horizontally** (if you'd like your object/group of objects to move horizontally) or **Vertically** (if you'd like your object/group of objects to move vertically) from the drop down menu
7. Click back on the object/group of objects to set the restrictor

Now your object/group of objects should only move in the direction. Be sure you are in BLUE mode!!! Use ORANGE mode to change the position of the restricted object/group of objects.
