

ACTIVINSPIRE TIPS AND TRICKS

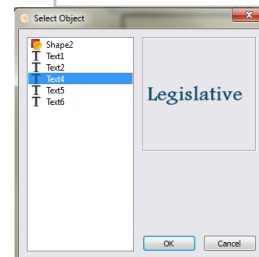

Setting Up Specific Object Containers

Specific object containers will only hold one object.

- Add all text, shapes, images, or objects to page and place where desired.
- Select the object that will be the container.
- Go to the *Property Browser* and expand the *Container* category.
- From the *Can Contain* drop down, select **Specific Object**.

- In the *Contain Object* window, click the **ellipsis**.
- Select the specific object from the *Select Object* window. Click **Ok**.

- From the *Return if not contained* drop down, select True.

- Click back on the container to set the action.
- Select all objects that are container choices.
- In the *Property Browser*, expand the *Container* category.
- From the *Return if not contained* drop down, select True for each object.
- After selecting true, click back on the object to set the action.
- **SAVE**
