

Promethean ActivInspire: Link to Another Page

Textboxes and other elements can be linked so when they are clicked they automatically take you to another location in the flipchart. The steps below are for text, but they can be followed to link objects etc. to other locations.

1. Click the **text tool** and **enter your text** onto your flipchart

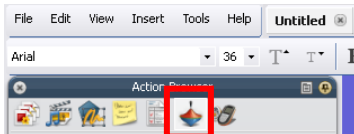

2. Once you have **completed your text editing**, change to the **object move tool** and **click on your textbox**

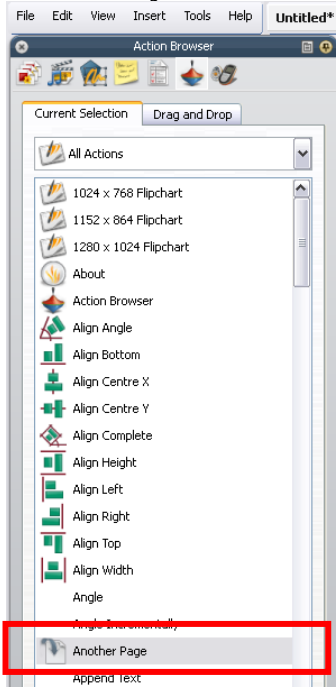

3. Access the **actions browser** by going to the **view menu** and **checking browsers** (if it is already checked, then the browsers are already turned on)

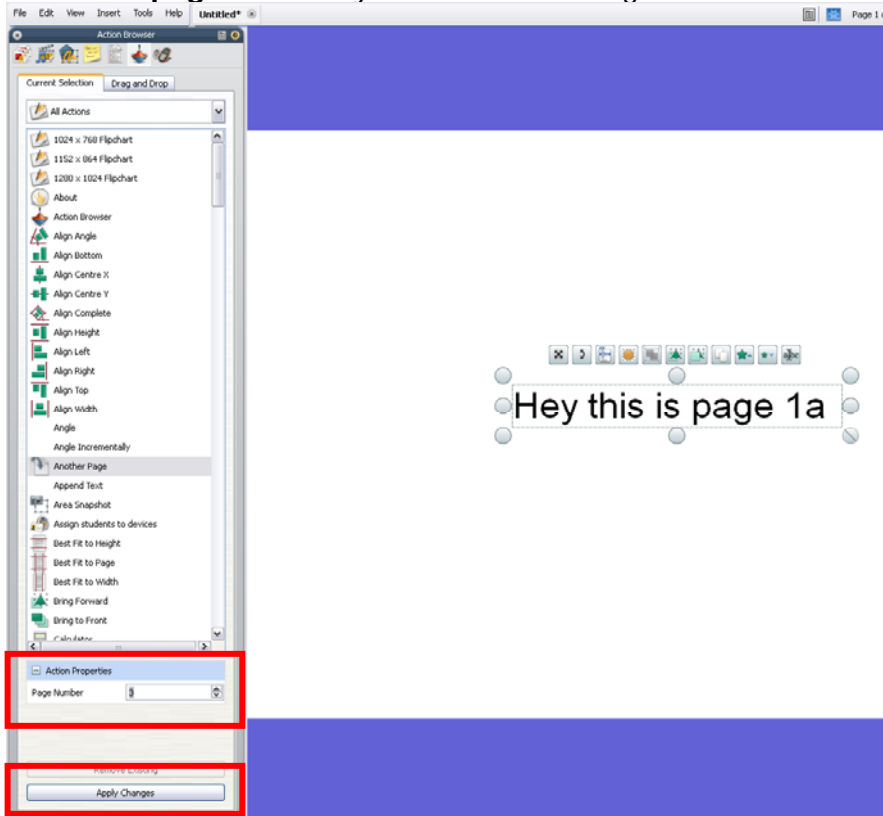

4. Click the **actions icon** to access the actions menu

5. Scroll until you find the **link to another page icon**

6. Enter the **page number** you want the link to go to and click the **“Apply Changes”** button

7. Click the text you have just linked and it will now **bring you to your specified page**
