

Converting a PowerPoint into ActivInspire

While you can insert individual screenshots of your PowerPoint, they'll just be static images, something you can look at, but can't edit. Instead of relying on the Camera Tool, convert the entire presentation—images, text boxes, and backgrounds—into a flipchart.

1. From the Dashboard, select "Import from Powerpoint."
2. Locate your .ppt file and click on "Open."
3. You'll then see a status bar, showing you the import progress. It may take a while depending on the amount of slides and images to copy.
4. Once rendered, you can manipulate your flipchart as you did when it was a PowerPoint.
5. Save your new flipchart.
